

## TS-909C

### Double Layer Infrared Ray Assembly Line

## TS-899

### Single Layer Infrared Ray Assembly Line

Features:

- 1.NIR Infrared ray light : Use the low dazzle Infrared ray light will not injure the operator's eyes. It can heat to glue inside & surface even and quicly.
- 2.Accurate Constant Temperature control sysem: Adopt the accurate temperature control system, the temperature can control precisely.
- 3.Double Layer Design: The Up Layer for Soles and down layer for the shoe upper , saving the time & space.
- 4.Movable Oven design: With the movable wheel on the bottom of the oven, it can move the oven easily according to the capacity for flexible production.
- 5.Temperature Control Warning System: It can set up the temperature maximum and minimum, The temperature alarm will start while the temperature will reach the setting temperature.

Specification:

Model	TS-909CA	TS-909CB	TS-909CD
Capacity	1500 pairs	2000 pairs	2500 pairs
Length of the Conveyor	16.5M*1.68*1.3M	18M*1.68M*1.3M	19.5M*1.68M*1.3M
N.W/G.W	4100/4600KGS	4400/4900KGS	4750/5250KGS
